

The Journal of Heredity

Vol. XXVI

APRIL, 1935

No. 4

CONTENTS

A TRIGENERIC HYBRID OF ZEA TRIPSACUM AND EUCHLAENA <i>By P. C. Mangelsdorf and R. G. Reeves</i>	129
FIVE GENERATIONS OF POLYDACTYLISM <i>By Brown S. McClintic</i>	141
CHINCHILLA MUTATION IN THE WILD HARE <i>By R. Prawochenski</i>	145
THE EUGENICS EXHIBIT AT CHICAGO <i>By Harry H. Laughlin</i>	155
TWO RELATED HAIRLESS MUTATIONS IN THE NORWAY RAT <i>By Horace W. Feldman</i>	162
LOCATING GENES ON SALIVARY CHROMOSOMES <i>By Otto Mackensen</i>	163

Maps and Slides of Salivary Chromosomes

MAPS of the giant salivary chromosomes form the groundwork for much new research and are of great value as instructional material as well. The two maps published in the JOURNAL (in the December, 1934, and February, 1935, issues) are offered, unfolded, on heavy paper for mounting or framing, at the following prices:

Painter's cytogenetic map of the salivary chromosomes, 9½ by 18 inches, line-cut showing major chromosome details and the genes approximately located to end of 1934—
Postpaid 50 cents

Same, on drawing paper..... 75 cents

Bridges' reference map of the banding of the salivary chromosomes, 9½ by 24 inches, halftone on heavy coated paper—Postpaid \$1.00

Copies of Bridges' map printed on drawing paper, may be drawn on with pencil or pen. (These show much less of the fine detail than the copies on coated paper, and are only recommended for use where it is desired to make notes and erasures on the maps.) \$1.50

A limited number of microscopic slides of permanent salivary chromosome preparations is available. Each, postpaid \$2.25

Slide with drawing identifying the chromosomes and principal "landmarks"..... \$3.25
