ARE THE TROPICS CLOSED TO THE WHITE RACE? (Rev. of GRENFELL: <i>White Settlers in the Tropics</i>).....	287

COMING

APOMIXIS IN HAWKWEEDS

Seed production without fertilization, which dismayed Gregor Mendel seventy years ago, is found to tell its own fascinating story of chromosomal evolution.

SEX-LINKED KERATOSIS

Horny overgrowth of the hair follicles causing ingrown body hairs on arms and legs. A new sex-influenced skin defect in man.

EUGENICS AND MEDICINE

A sound eugenics policy seen by a famous physician as being actually a long term public health program.

POLYPLOID AMPHIBIA

Plants have gone extra-chromosome conscious in a big way of late. Now the animals are getting on the band wagon, too, or at least the facts of chromosomal existence are being better understood.

POULTRY GENETICS

A new plumage allelomorph in the turkey, and more about pheasant hybrids.
