

journal of HEREDITY

An international journal of
genomic and evolutionary diversity

Volume 100 | Number 4

July/August 2009

Original Articles

Battle and Ballet: Molecular Interactions between the Sexes in *Drosophila*

Mariana F. Wolfner

399

Conservation Genetics and North American Bison (*Bison bison*)

Philip W. Hedrick

411

The “Useful Questions of Heredity” before Mendel

Vítězslav Orel

421

Population Genetics of *Astragalus bibullatus* (Fabaceae) Using AFLPs

Carol J. Baskauf and John M. Burke

424

Genetic diversity and stress of *Ricotia lunaria* in “Evolution Canyon,” Israel

Olga Kossover, Zeev Frenkel, Abraham Korol, and Eviatar Nevo

432

Methods and Prospects for Using Molecular Data in Captive Breeding Programs: An Empirical Example Using Parma Wallabies (*Macropus parma*)

Jamie A. Ivy, Adrienne Miller, Robert C. Lacy, and J. Andrew DeWoody

441

Fast versus Slow Larval Growth in an Invasive Marine Mollusc: Does Paternity Matter?

Sabrina Le Cam, Jan A. Pechenik, Mathilde Cagnon, and Frédérique Viard

455

Heterochromatin-Mediated Gene Silencing Is Not Affected by *Drosophila* CBP Activity

Sarah M. Smolik

465

Hermes Transposon Distribution and Structure in *Musca domestica*

Ramanand A. Subramanian, Laura A. Cathcart, Elliot S. Krafus, Peter W. Atkinson, and David A. O’Brochta

473

Brief Communications

The Candidate Gene *XIRP2* at a Quantitative Gene Locus on Equine Chromosome 18 Associated with Osteochondrosis in Fetlock and Hock Joints of South German Coldblood Horses
Catherine Wittwer, Henning Hamann, and Ottmar Distl

481

Coordinated and Fine-Scale Control of Homoeologous Gene Expression in Allotetraploid Cotton

Lex E. Flagel, Liping Chen, Bhupendra Chaudhary, and Jonathan F. Wendel

487

Gene Expression in a Wild Autopolyploid Sunflower Series

Sheri A. Church, and Emma J. Spaulding

491

Improved Genetic Mapping of Endosperm Traits Using NCIII and TTC Designs

Xuefeng Wang, Wen Song, Zefeng Yang, Yamin Wang, Zaixiang Tang, and Chenwu Xu

496

Mapping an Overdominant Quantitative Trait Locus for Heterosis of Body Weight in Mice

Akira Ishikawa

Book Review

Plant Genotyping II: SNP Technology

Martha T. Hamblin

505

The cover.

Astragalus bibullatus (Pyne’s ground plum) is a federally endangered species endemic to limestone cedar glades in Tennessee. Although this rare species has low levels of genetic variability, some genetic substructuring is detectable using AFLP markers (see Baskauf and Burke, pp. 424–431). Photograph by Steven J. Baskauf, © 2003.
