The American Genetic Association

An incorporated organization devoted to promoting a knowledge of the laws of heredity and their application to the improvement of plants, animals, and human racial stocks.

Its membership is composed of men of science, teachers, publicists, physicians, clergymen, parents, students, horticulturists, and breeders of livestock throughout the world.

The Association owns the Journal of Heredity, which is published bi-monthly and sent to each member without additional cost. Every member is thus a part owner of the Journal.

Membership imposes no burdensome obligations. The Association, which is co-operative in nature, welcomes assistance in research, but does not demand it. Members are invited to submit discussions of the results of their research, accompanied by new and unusual photographs. All papers received will be given full consideration by the editorial board.

Manuscripts should be sent to the Editorial Office of the Journal, 1507 M Street, N. W., Washington 5, D. C.

Proof: In order to facilitate prompt publication only galley proof will be sent to authors.

Reprints: On request the author can purchase reprints at cost.

REQUIREMENTS FOR MEMBERSHIP

Subject to the approval of the Council, any person interested in the improvement of the human race or the creation of better varieties of plants and animals, is eligible for membership.

The Association welcomes all who are interested in its program, and the Secretary will be glad to answer any inquiries.

Annual dues, giving the right to attend all meetings and receive the Journal of Heredity, are $8.00 within the United States and its possessions, $8.25 in Canada, and $9.00 in all other foreign countries; life membership, $100. Subscription to the Journal is $10.00 per year (foreign postage extra).

If you are not already a member, and want to become one, or if you know of anyone who would be interested in membership, write to
