Announcements

Online Submission and Review through Manuscript
Central
We are pleased to announce that Journal of Heredity
will be moving to online submission through Manuscript
Central in early 2008. This will expedite manuscript
submission and review, as well as improve our ability to
track revisions and communicate with Associate Editors
and authors. In preparation for this move, all AGA
members will receive, by email, an invitation to register as an
author and reviewer. By registering, you will facilitate
your future submissions and assist us in selection of
potential reviewers. When you receive your email
invitation, please follow the link to Manuscript
Central and provide the requested information. You will only need to
enter this information once. Our goal is to keep the
registration as simple as possible and to assist members
with any difficulties. Please contact the Editorial Office at
agajoh@oregonstate.edu if you encounter any
problems. If we do not have your email address, please send it and
your subscription number to the Editorial Office.
C. Scott Baker, Editor
Anjanette Baker, Managing Editor
Information for Contributors

Instructions to Authors

Please read and follow these instructions carefully, doing so will ensure that the publication of your manuscript is as rapid and efficient as possible. The Publisher reserves the right to return manuscripts that are not prepared in accordance with these instructions.

Submission of Manuscripts

Authors should submit the electronic manuscript and any electronic figure files to the editor, Dr. C. Scott Baker, American Genetics Association, Hatfield Marine Science Center, 2030 SE Marine Science Dr., Newport, OR 97365; telephone: (541) 867-0334/fax: (541)867-0345. E-mail Dr. Baker at agajoh@oregonstate.edu or submit materials to one of the journal’s associate editors, whose addresses can be found at www.theaga.org. Authors of Computer Notes must also include detailed instructions of how to use their program.

For typesetting purposes, electronic manuscripts must be in Word or rich-text format. TeX and LaTeX files are also acceptable, when accompanied by a PDF of the manuscript file. Electronic figure requirements are listed below.

Copyright and Permissions

It is a condition of publication that authors assign exclusive copyright to the AGA. In assigning copyright, authors may use their own material in other publications, provided that the Journal is acknowledged as the original place of publication, and both the editor and Oxford University Press are notified in writing and in advance.

On acceptance, copyright forms should be returned immediately by fax to OUP, and a copy must be posted by airmail within 24 hours. If the form has not been received at OUP by the time the manuscript arrives, publication of the article will be delayed.

Work submitted for publication must be original, previously unpublished, and not under consideration for publication elsewhere. If previously published figures, tables or parts of text are to be included, the copyright-holder’s permission must have been obtained prior to submission.

Preparation of the Manuscript

General: Manuscripts should be prepared using a word processing program, saved as a .doc (Word) or .rtf (rich-text format) file, and typed, double-spaced, with 1-inch margins on 8 1/2-by-11-inch paper. There is no page limit, but it is recommended that manuscripts not exceed 16 typewritten pages plus tables and illustrations. Long papers are subject to delays in reviewing and editorial consideration. Metric units should be used where applicable. Pages should be arranged and numbered consecutively in the following order: title page, abstract, text, references, figure legends, and tables, with illustrations provided separately in either hard copy or electronic format. The title should concisely inform the reader of the subject of the paper and the organism to which it relates; it should contain no more than 75 characters. A subtitle can be used when greater length is unavoidable.

The title page (page 1) should contain the title of the article; the author’s first and last name(s) and affiliation(s) with complete addresses; e-mail addresses; phone/fax number; acknowledgments; and a running title.

An abstract is required. It should consist of one paragraph of no more than 200 words that is complete without reference to the text. Acronyms and complex abbreviations should not be used. References to literature, figures, and tables should not be included.

The text should be readable, clear, and concise. First-person active voice is preferable to the impersonal passive voice. Authors whose native language is not English should arrange to have their manuscripts written in idiomatic English before they are submitted for publication. Papers lacking proper English structure and usage will not be considered for publication and will be returned to the author without review. Standard nomenclature should be used in organisms for which formal rules have been established and published. For these, authors are referred to the CSE Manual for Authors, Editors, and Publishers: Scientific Style and Format (7th ed.). Unfamiliar or new terms, as well as abbreviations, acronyms, and symbols, should be defined at first mention. Italics should not be used for emphasis. Footnotes are undesirable and should be avoided; descriptive material should be parenthetically included in the text. All tables and figures must be referred to in the text.

References should be typed alphabetically on a separate page, double-spaced and unnumbered. They should be referred to in the text by the name(s) of the first author(s) and the year of publication in parentheses, e.g., (Able and Baker 1987b). Use the first author’s name and “et al.” when there are more than two authors. The order for references within parentheses in the text should be alphabetical. For works by the same author(s) in the same year, append a lowercase a, b, c, etc., to the year of publication. The reference list should contain all authors’ names and conform to the following styles:

Journal article

Paper in a conference proceeding(s)

Book

Author GH, Author IJ, 1985a. Title of book. Rye, NY: Publisher’s Name.

Chapter in a book

Thesis or dissertation

Internet sources

Only published references or references accepted for publication should be included in the reference list; such things as personal communications, unpublished data, manuscripts in preparation, etc., should be incorporated in the text in parentheses and include the initials and surname of the source, e.g., (OP Able, personal communication). When citing Internet sources, please provide a complete URL address and the date on which the page was accessed or updated. Authors are responsible for the accuracy of their references.

Figure legends should be typed together on a separate page. They should define all symbols and abbreviations used in each figure.

Figures: Where possible, figures should be supplied in an electronic format at a suitable size for printing with the following resolutions: 1200 dots per inch (dpi) for line drawings; 300 dpi for halftones and color; 600 dpi for combinations.

Please note that unacceptable figures will delay publication. “Digital Expert” software is available free from The Sheridan Group at http://dx.sheridan.com/onli/. Please use this program to check that electronic figures are in a format suitable for publishing. If the figures are not suitable the Digital Expert will offer instructions for fixing the figures.

If authors cannot supply electronic figures, then high quality laser printouts or photographs are acceptable.

Please note that illustrations in color will be accepted only if the authors defray the cost (currently $600 per page of color) or by special permission of the Editor. We ask that you submit figures containing color only if you want them to be printed in color. Note also that authors should add 100% for any offprints including color reproduction.

Proofs
All manuscripts will undergo some editorial modification so it is important to check proofs carefully. PDF page proofs will be sent to the corresponding author for checking via email. To avoid delays in publication, proofs should be checked and returned within 48 hours. Corrections should be returned by PDF annotation, e-mail, fax, or courier (FedEx or DHL) to the Production Editor. Extensive changes to the text may be charged to the author.

Supplementary Data
All material to be considered as supplementary data must be submitted at the same time as the main manuscript for review. Please indicate clearly the material intended as Supplementary Material upon submission. Also ensure that the supplementary material is referred to in the main manuscript at an appropriate point in the text. It must be supplied to the production department with the article for publication, not at a later date. It cannot be altered or replaced after the paper has been accepted for publication.

Please note that supplementary material will not be copy-edited, so ensure that it is clearly and succinctly presented, and that the style of terms conforms with the rest of the paper. Also ensure that the presentation will work on any Internet browser. A maximum of 5 files is acceptable to make up the supplementary material unit for an article. The maximum size per file should not exceed 2 MB.

Page Charges
A page charge of $60 per published page will be made for all papers. In cases in which research funds are not available to meet publication costs, the author should submit a statement to the editor at the time the paper is submitted specifying the reasons for lack of funds and requesting a waiver of the publication charge. No paper will be rejected because of the lack of funds, but publication may be delayed if charges are not paid. Authors will receive a form with their page proofs showing the page charge and reprint prices.

Page charges of one page per volume will be waived for authors who are members of the American Genetic Association. Cost of membership is currently $65. Authors who wish to join the Association will receive membership forms and a page charge discount offer with their article proofs.

Offprints
In addition to an AGA membership form, an offprint order form will accompany the proofs. Authors may purchase print and/or electronic offprints and journal copies at a discount (50%) using this form. Please see offprint forms for complete ordering and pricing information.

Cover Consideration
A full-color illustration is featured on the cover of each issue, the cost of which is borne by the journal. Authors whose photo is used on the cover receive 25 free color covers. The cover is available to any contributor whose manuscript is accepted for publication, providing the photographic material is of high quality. For electronic submission of potential cover images, please send the image at 350 dpi CMYK as both a .jpg and a .tif or .eps file to the editorial office; the .jpg will be used for publication, providing the photographic material is of high quality. For electronic submission of potential cover images, please send the image at 350 dpi CMYK as both a .jpg and a .tif or .eps file to the editorial office; the .jpg will be used for evaluation only.

Author Self-Archiving/Public Access policy from January 2007
For information about this journal’s policy, please visit our Author Self-Archiving policy page at http://www.oxfordjournals.org/access_purchase/self-archiving_policya.html.

Funding
Details of all funding sources for the work in question should be given in a separate section entitled “Funding.” This should appear before the “Acknowledgments” section. The following rules should be followed: the full official funding agency name should be given, i.e., “National Institutes of Health,” not “NIH”; grant numbers should be given in parentheses; multiple grant numbers should be separated by a comma; agencies should be separated by a semi-colon; no extra wording like “Funding for this work was provided by...” should be used; where individuals need to be specified for certain sources of funding the following text should be added after the relevant agency or grant number “to [author initials].” An example is given here: National Institutes of Health (CB5453961 to C.S., DB645473 to M.H.); Funding Agency (hfygr667789).
